PROFILE SUMMARY

Program & PMO Manager with **16+ years** in automotive and industrial manufacturing, working with OEMs in two-wheelers, commercial vehicles, marine, railway and defense. Most recently ran PMO governance for the Honeywell account at Tech Mahindra, working daily with US-based teams through a **corporate carve-out** and a **portfolio-system migration**. Before that, built an NPD PMO from scratch at a Tier 1 automotive supplier and took products from drawing to series production as program lead, key account manager and sourcing engineer, with **APQP, PPAP, VDA 6.3 and supplier development** as everyday work.

CORE COMPETENCIES

- Project & Program Management · End-to-End Delivery
- NPD · APQP · Phase-Gate · Launch
- Industrialization · Capacity Ramp-up
- Scheduling · Critical Path · Change Control
- Sourcing · Supplier Development · Make-or-Buy
- PPAP · PFMEA · 8D · VDA 6.3
- PMO Set-up · Governance · Steering Reporting
- PPM Migration · Process Standardization
- AOP · Cost Tracking · BOM Costing
- Stakeholder & Risk Management · Escalation
- AI-assisted Analysis (Copilot) · Power BI · VBA
- PTC Windchill · SAP PP/PLM · MS Project · Planisware

PROFESSIONAL EXPERIENCE

Lead, PMO — Tech Mahindra (Honeywell Account) *May 2023 – July 2026*

- Led the **Accolade-to-Planisware migration** of the full live and historical portfolio, covering stage-gates, investment and expense data, 5/10-year revenue forecasts and P&L; wrote system requirements, managed data integrity and trained users.
- Maintained **PMO governance and reporting continuity** through the **Honeywell Advanced Materials carve-out into Solstice**, coordinating priorities, risks and dependencies across Finance, Engineering and Supply Chain with US-based teams.
- Built and maintained **baselined schedules in MS Project**, tracking critical path and milestones, managing changes under **formal change control** and reporting schedule and cost status to management.
- Validated expenses against the Annual Operating Plan and built **AOP 2026 dashboards** that senior management used for fund, kill and scale decisions, with all pipeline projects retained.
- Automated **Power BI revenue reporting**, built a **VBA macro** that emailed alerts on tracker issues, and reconciled revenue, margin and spend monthly with Finance, using Microsoft Copilot to flag gaps against system records.
- Established the Honeywell **PMO Process Site in Confluence** as the single reference for process documentation, templates and governance standards, and led its **migration to Solstice** during the carve-out.
- Consolidated monthly **NPI and program-status reports** on expenditure, risks and actions, coordinated **SKU submissions**, and reviewed team deliverables before release to management.

Head of NPD (Deputy Manager, New Product Control) — UnoMinda Limited *Jan 2022 – Apr 2023*

- Acted as **NPD Head of Department at Hosur**, built the division's **PMO governance framework from scratch** and owned APQP gate-review criteria and gate decisions; led and mentored four direct reports and eight matrix contributors.
- Managed the division's development portfolio across scope, schedules, resources, capacity, cost, quality and delivery. **More than 90%** of projects met objectives, and the FY22–23 cycle delivered a **12% margin improvement**.
- Ran TVS Motor and Ather Energy programs: led **BMW CE 02** handlebar and switch development to first pilot lot, the TVS Ronin project to serial handover at **200 units/day**, and TVS iQube micro-switches to the first T2 sample lot.
- Chaired APQP stage-gate reviews in an **IATF 16949** environment, aligning engineering, quality, manufacturing and suppliers on PFMEA, validation, PPAP, pilot builds and production readiness; applied **VDA 6.3** on BMW projects.
- Led **trial runs on all assembly fixtures** and component validation campaigns on switch and handlebar assemblies with integrated electronics and wiring; introduced Zoho Projects as the division standard and achieved **over 85% First Time Right**.
- Used **SAP PP** for BOM, **shortage analysis and materials planning**, and coordinated order fulfillment, returns for rework or rejection, and replacements for TVS Motor and Ather Energy through ramp-up and serial supply.

Gabriel India Limited

Oct 2016 – Dec 2021

Key Account Manager, Business Development (OEM Programs) — *Jan 2020 – Dec 2021*

- Planned capacity ahead of OEM demand that grew from about 200 to 600 units/day, peaking at **130,000 units a year**.
- Led **TVS Jupiter 125 front and rear suspension development** through initial PPAP, pilot builds, **customer PSW sign-off and production handover**, coordinating engineering, quality and supply requirements.
- Led suspension development for **Jawa 350 Classic, Jawa Perak, Yezdi Adventure and Scrambler, and Royal Enfield Interceptor 650 and Himalayan** through productionization, owning the complete DVP process and planning **20,000-cycle durability tests**.
- Served as primary contact for **Mahindra Two Wheelers and Ather Energy (450 series)** after launch, managing **order fulfillment, daily supply, returns and replacements**, account revenue, and field replacement actions on Ather and Royal Enfield models.
- Aligned engineering, quality, supply chain and suppliers on requirements, changes and corrective actions. Used **PTC Windchill** for engineering change requests, **BOM release** and document control, and tracked PLM–SAP release workflows.

Senior Engineer, Sourcing & SCM — *Oct 2016 – Jan 2020*

- Managed **outsourced component development** as project manager after design release: prepared the **make-or-buy sheet** and ran supplier selection, development milestones, qualification, PPAP and production handover.
- Evaluated supplier quotations, negotiated **component and tooling costs** and managed **contract sign-off** for domestic and China-based suppliers, including imports, freight and customs. Reconciled BOM and process costs with Finance.
- Expanded and rationalized the supply base: **added and qualified new suppliers** for castings, forgings, sheet-metal and spring parts, and **consolidated vendors** to concentrate volume and simplify supplier management.
- Led **supplier localization** for high-criticality parts, bringing supplier plants or warehouses near the factory under JIT, and **re-sourced parts from China to India** with dual sources to cut lead time and single-source risk.
- Led supplier KPI reviews, 8D and Ishikawa analyses and corrective actions across quality, cost, delivery and capacity. Improved First Time Right from **65% to 87%** and kept new-product rejection **below 10%**.
- Spent two months on-site developing an aluminum hot-forging supplier, improving process controls and completing PPAP with SQA; increased capacity to **300 component pairs/day** at **90% combined quality and delivery performance**.
- Led Royal Enfield Interceptor child-component sourcing and stabilization, raising vendor productivity **15%** with VA/VE and Value Stream Mapping. Cut part cost **15%** on a high-volume product through zero-based costing (about INR 2.5 million saved), and proposed a design change removing ~20 g from an aluminum die-cast part, saving about INR 300,000 a year.

Earlier Engineering and Manufacturing Experience (2010–2016)

- **Senior Engineer, MED (NPD In-charge) — Rane Engine Valve Limited (2014–2016):** Set up a complete production line for large engine valves, from layout and equipment specification through commissioning and trial runs, for customers including MTU Friedrichshafen (Rolls-Royce Power Systems), Wärtsilä, Caterpillar, BEML and Indian Railways; commissioned an induction-hardening system with the equipment supplier, prepared PPAPs, applied VDA 6.3 on Daimler projects and personally ran MPI and ultrasonic testing. Traced EN52 defects to heating and cooling conditions and added a controlled process step, reducing rejection from **80% to 15%** and increasing output to 110 units/shift.
- **NPD Engineer — Nash Industries (I) Pvt. Ltd. (2012–2014):** Developed sheet-metal parts for **Scania, Volvo Construction Equipment and Daimler India** through PFMEA, PPAP, pilot builds and validation to zero-rejection production; created Control Plans and applied SPC; used AutoCAD and SolidWorks and represented Development in customer and ISO 9001 audits.
- **Senior Engineer, NPD — Digh Vijay Plastics and Allied Products (P) Ltd. (2010–2012):** Developed fabricated and sheet-metal long members, cross members and fuel-tank brackets for **Ashok Leyland and Daimler India**; managed BOM and engineering-change control, process planning, product costing, customer cost negotiations and vendor development; prepared PPAPs.

EDUCATION

M.Tech in Manufacturing Management — BITS, Pilani | CGPA 6.61 (≈ German grade 2.0, gut)

B.E. in Mechanical Engineering — Anna University, Chennai | 68% aggregate (≈ German grade 2.0, gut)

LANGUAGES

English (Fluent) · German (A1, in progress) · Malayalam (Native)

PROFESSIONAL DEVELOPMENT

PMP Exam Preparation — 35 contact hours of formal project management education (PMI-aligned). Working knowledge of Agile and Kanban.
